بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

بسم الله الرحمن الرحيم, الحمد لله رب العالمين, والصلاة والسلام على أشرف

المرسلين, وعلى آله وصحبه أجمعين

لقد بين لنا الله من خلال النظام الكوني, استمرارية المواد كأشياء, وتكرار الظواهر

كعلاقات سببية, لنراقبها ونذكرها وننتفع بها في حياتنا بعد أن نقف على حقيقة

سلوكها, ونستدل بها على قدرته ووحدانيته, مصداقا لقولته تعالى **سنريهم**

آياتنا في الأفاق وفي أنفسهم حتى يتبين لهم أنه الحق....(53) سورة فصلت

والفيزياء تعد دائما في مقدمة العلوم المعنية بدراسة المواد والظواهر الطبيعية

المختلفة, وهي التي تقود التقدم العلمي والتقني للبشر فنظرة سريعة لما يتم حولنا

من إنجازات في مجالات عدة كارتياح الفضاء, وثورة المعلومات, ونظم الاتصالات, وغيرها

كفيلة بإلقاء الضوء على الدور العظيم الذي تضلع به الفيزياء.

وفيزياء الحالة الصلبة-موضوع لهذا الكتاب- هي أحد فروع الفيزياء المعنى بالبحث في

طبيعة المواد الصلبة وخصائصها المختلفة: الميكانيكية والكهربية و المغناطيسية والحرارية

والضوئية وغيرها.

والأجسام الصلبة قد تكون بلورية فتشكل مملكة مترامية الأطراف, رعاياها من المعادن والمواد العازلة و أشباه الموصلات والموصلات الفائقة, وغيرها. وهي تسلك في الظروف المختلفة ضروبا متباينة من السلوك الذي يوحى بمجالات تطبيقية شاسعة. كما أنها قد تكون غيربلورية, ولها هي الأخرى تطبيقاتها الخاصة والكتاب الذي بين أيدينا يحاول أن يصحب القارئ العربي في جولة قصيرة إلى دنيا فيزياء الأجسام الصلبة, حيث اختيرت محتوياته بعناية لكي تلبي احتياجات المقرر الدراسي لمقياس الفيزياء الصلبة I في الجزء الأول منه و مقياس خصائص الأجسام الصلبة في جزئه الثاني وكلاهما خاص بطلاب السنة الثالثة فيزياء **L.M.D**, وقد صيغت فصول هذا الكتاب بشكل مترابط يجعل القارئ لا يجد صعوبة في الفهم و الاسترسال من فصل لآخر

والله نسأل أن يعيننا على عرض محتويات كتابنا هذا بجزأيه الأول والثاني بالطريقة التي تيسر للقارئ فهمها واستيعابها. ونأمل أن يوجهنا القارئ الكريم إذا ما صادفته هنة أو ملحوظة يرى إضافتها هنا أو هناك .. متمنين قول القائل:

إن تجر عيبا نسر الخلالا جل من لا عيب فيه دعلا
