

Personal work

Choose a theme in Computer science and prepare a general presentation (*Introduction, history, application, technical information ...etc.*) about it (*5 to 10 slides, about 5 min*). It's a personal work; each student must do his/her own presentation and it'll represent 40% of the final CC mark.

P.S. The Mark depends on the choice of the subject (new, innovative).

Subjects Example:

Artificial Intelligence/ Robotics/Cloud computing/Image processing/Networks/ Data Mining/
Android Apps/ Machine learning/ Deep Learning/ Neural Networks/ Cryptography /Cyber
Security ...
